

gTimeTrack user guide (v0.1)

Installing gTimeTrack

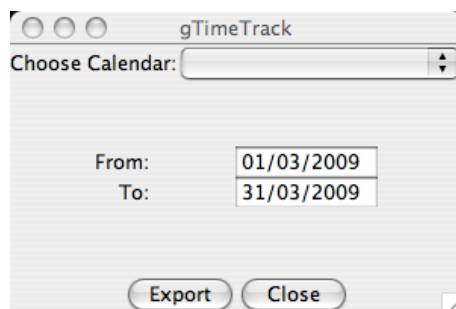

Download and unzip the file gTimeTrack_v3.zip

Running gTimeTrack

1. Run gTimeTrack.bat (Windows) or gTimeTrack.sh (Linux).
2. The first time you run the program you must enter your Google Calendar account user name and password.

3. Choose one calendar from the list and the interval of time of the data that you want to export.

4. Click on the "Export" button. Then choose the folder and the name of the file that is being generated (the extension won't be written automatically).
5. Now you can make a new exportation or quit the program by clicking on the "Close" button.
6. Import the file with OpenOffice or Excel. Separator char: ;. Last column is the location of the activity.

Requirements:

- Java Virtual Machine version 1.5.x
- A Google Calendar account.
